# Color Cube

# RGBA Color

Representation of RGBA colors

Values for red, green, blue and alpha are floating point values with a range from 0 to 1

Alpha component (a) defines transparency

alpha of 1 is completely opaque, alpha of zero is completely transparent

Black RGBA is (0, 0, 0, 1)

Blue RGBA is (0, 0, 1, 1)

Gray RGBA is (0.5, 0.5, 0.5, 1)

Clear Completely transparent. RGBA is (0, 0, 0, 0)

# RGBA Color

Black RGBA is (0, 0, 0, 1)

Blue RGBA is (0, 0, 1, 1)

Gray RGBA is (0.5, 0.5, 0.5, 1)

Clear Completely transparent. RGBA is (0, 0, 0, 0)

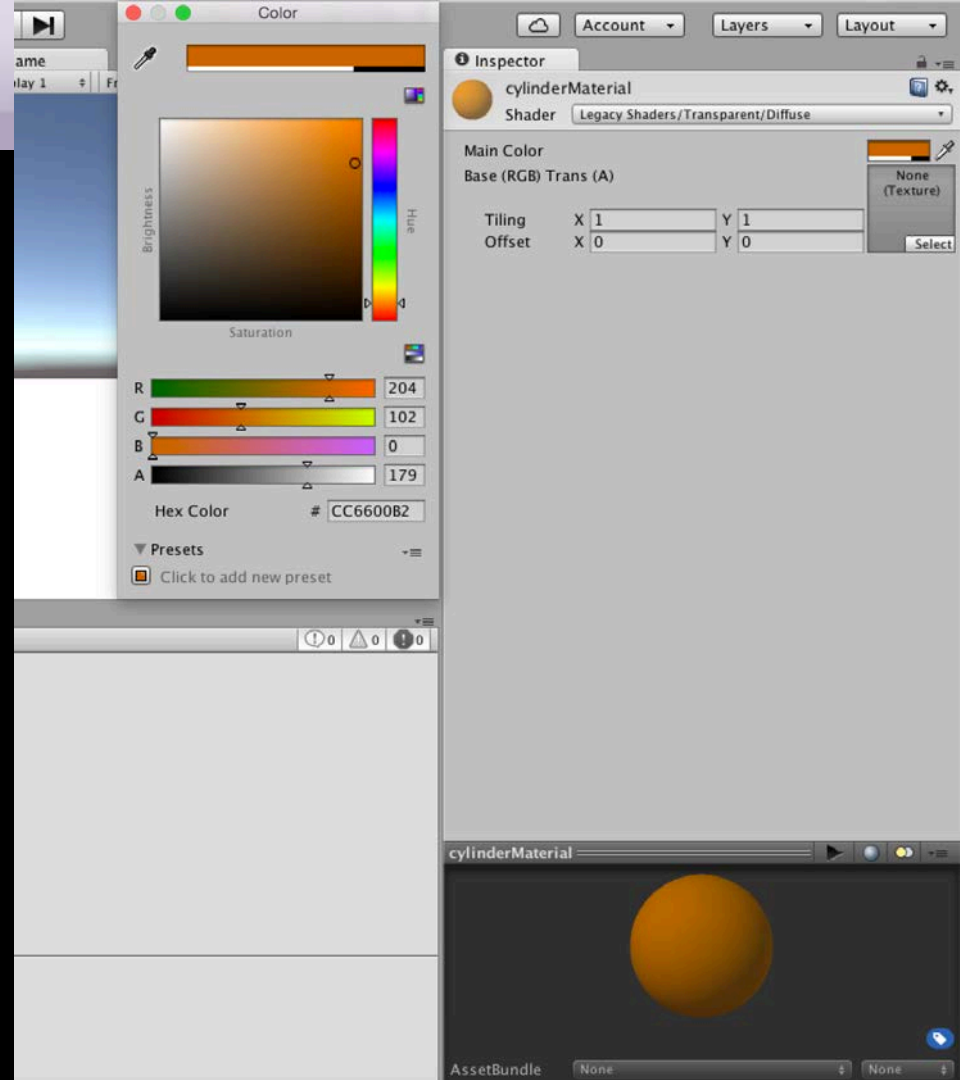

Magenta?

Yellow?

cyan?

Create a scene (or use the scene from lab2) with the following components:

- 3D Plane
- 3D Cube
- 3D Cylinder

Create 2 new materials and add transparent/diffuse shader

Assign materials to the cube and the cylinder (drag and drop)

# materialsScript

```
private var orange : Color = Color(0.8, 0.4, 0.0, 0.7);  
var newMaterial : Material;
```

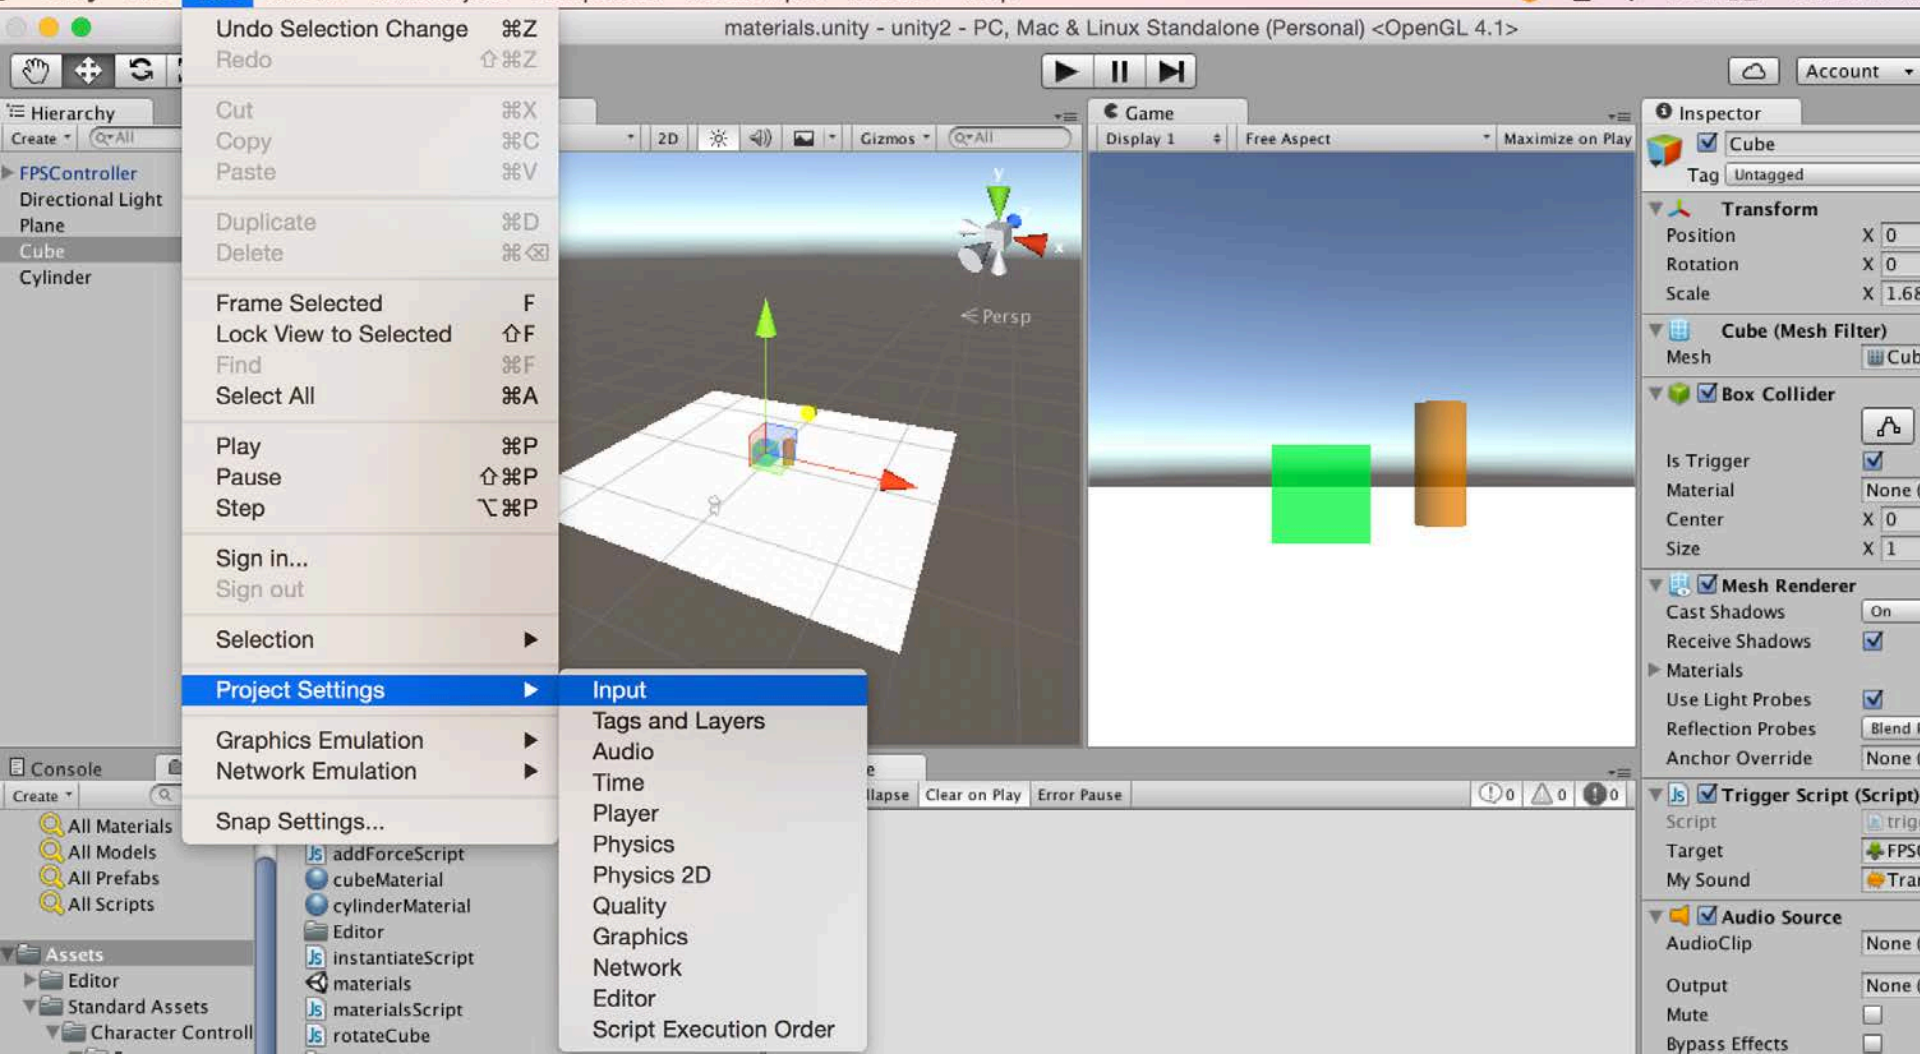

```
function Update()  
{  
  if (Input.GetButtonDown("Fire1"))  
  {  
    GetComponent.<Renderer>().material.color = orange;  
    newMaterial.color = orange;  
  }  
}
```

Assign Material1 to the var newMaterial in the inspector

Add Rigidbody component to the Cylinder  
In the Inspector

The screenshot displays the Unity 2D development environment. The main scene is in a perspective view, showing a green cube and a brown cylinder on a white grid floor. The Inspector panel on the right shows the properties of the selected Cylinder object, including its Transform, Mesh Filter, Capsule Collider, and Mesh Renderer components. A search window is open over the Inspector, showing a list of components starting with 'Rigidbody'.
